

Making aliens

Make up some alien names using non-words with the same initial sound such as: Mig mog mully moo

San son sippy soo

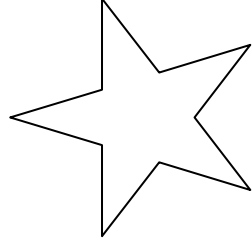

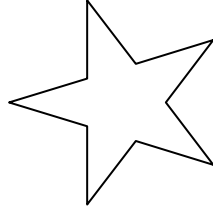

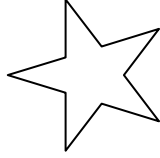

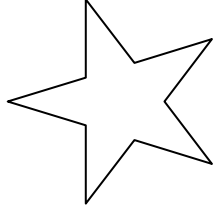

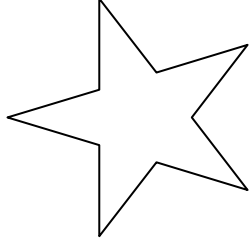

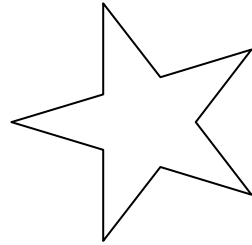

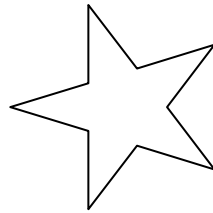

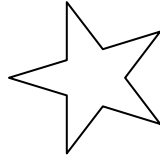

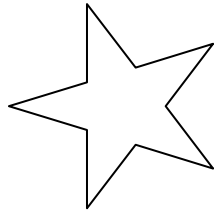

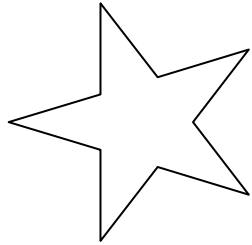

Talk to the children about the names and help them imagine what the alien might look like.

You could use playdough and stick on eyes, straws, feathers etc to create aliens or monsters. Make up alliterative names for the aliens emphasising the initial sounds of the aliens name.

You can use the worksheet in this pack for the children to draw their own alien and write down the alliterative name they make up for their alien.

The colourful aliens could be displayed and the children could make up different names for them each day using the same initial sounds.

My Alien

My alien is called _____
